

Lietuvos STATISTIKŲ
sajunga

The Lithuanian Statistical Society

Dear Estonian statisticians,

With the greatest pleasure the Lithuanian Statistical Society congratulates the Estonian Statistical Society, all Estonian statisticians celebrating their 20-year anniversary. We have witnessed with admiration how your society progressed to maturity during a short but challenging historical period. The conferences organized by the Estonian Statistical Society attracted hundreds of participants, being a pronounced and impressive sign of your accomplishments. This demonstrates how committed you are: statistics can be attractive and interesting. At the same time, you know better than others: it is indispensable for an advanced society.

Lithuanian statisticians have always had exceptional personal and scientific relations with Estonian friends. We are proud and happy that a senior generation of Estonian mathematical statisticians were awarded their doctorates in Vilnius, that over the years many of Estonian statisticians took part in International Vilnius Conferences on Probability Theory and Mathematical Statistics. Together with Estonian and Latvian statistical societies, we successfully joined NORDSTAT conferences.

In statistics and beyond, we sincerely wish new accomplishments to all Estonian statisticians: practitioners, scientists, applied statisticians and students.

*From the bottom of our hearts,
The Lithuanian Statistical Society*
