

Actuarial Analyst – Title Insurance (Part-Time Internship → Full-Time Career Path)

About Us

We are a U.S.-based FINTECH property valuation firm (www.homestat.org) working with over 300+ banks across the United States. Our products use statistical models and human expertise to evaluate real estate. We are now expanding into Title Insurance with a company domiciled in South Dakota, and are looking for a motivated student to join us on this journey. This will be the world's first FINTECH company.

Why This Opportunity?

This is a rare and exciting opportunity for a student with strong analytical and statistical skills to start as a part-time internship student and grow into a full-time leadership role. The selected candidate will be trained and groomed for our Title Insurance division, with the responsibility to lead and train a team in the future.

What You'll Do

- Start as an intern while in school for 1 year and get training. After that become a full-time team member.
- Study and prepare for Title Insurance licensing exams in the U.S. (company will provide guidance and support).
- Learn to perform title insurance underwriting services, including risk analysis and policy evaluation.
- Support actuarial and data submission requirements for U.S. insurance regulators.
- Work with company leadership on statistical models, pricing, and compliance.
- Grow into a role where you will lead a team of analysts.

Who We're Looking For

- Current final year with 1 year left to graduate in Actuarial Science, Quantitative Economics, Statistics, or related fields.
- Strong English communication skills (spoken and written).
- Strong analytical and problem-solving mindset.
- Detail-oriented with the ability to handle complex data.
- Eager to learn, grow, and take on leadership responsibilities.
- No prior work experience required — we will train and mentor you.

Career Path

- Intern with part-time role (while training & preparing for exams).
- Transition into full-time role after graduation.
- Leadership opportunity: build and manage your own underwriting team.

What We Offer

- Direct mentorship from U.S. leadership and industry experts.
- Full training on title insurance underwriting and actuarial compliance.
- A clear career path from student trainee to Actuarial Analyst
- Competitive compensation after transition to full-time.
- The chance to play a pioneering role in building a new division in a U.S.-based firm.
